## Sadad payment gateway

This allows customers to place their preferred products in the shopping cart. Then proceed to the checkout by clicking the Check Out button. The customer therefore proceeds with the steps on the checkout page. Finally, the customer selects the Sadad payment method. Then check the Terms and Conditions box and click the Next button to continue. Now enter your Sadad account ID and click the Confirm Order button to continue. After clicking on the Confirm Order button, the customer will be redirected to Sadad Payment System. Here, the customer must enter his Sadad account ID and password and then click on the Continue button. Payment Now has the page that appears the transaction details. Select your secret image here, select a one-time password method, and then click the Send button. So, post click the Send button in the figure above. This allows the customer to see the transaction details that — merchant reference number, Sadad transaction number, transaction amount, description, and status of the transaction. Now the customer is redirected back to the dealer website. Here you can see the notification for the successful order. The customer can also check the order details by navigating to the Order History section. So to check the details of the placed order, click the View button for each order. From now on, the details of the order will be displayed, in which the customer can see the payment method used. So, that's all for the OpenCart Sadad Payment Gateway. For any questions or suggestions you will receive us to support@webkul.com customers will receive a ZIP folder and they will need to extract the contents of this ZIP folder on their system. The extracted folder has a src folder, within the folder folder you have the app folder. You must transfer this app folder to the Magento2 root on the server, as shown below: After the successful installation, you must run these commands in the Magento2 root. First command - php bin/magento setup:upgrade Second Command - php bin/magento setup:di:compile Third Command - php bin/magento setup:static-content:deploy After running the commands, you need to navigate the cache from the Magento Admin panel through -&gt;System&gt;Cache Management, as shown in the snapshot below. For multilingual support, the administrator navigates through Store-&gt;Configuration-&gt;General -&gt;Locale Options and selects the locale as the German (the language the administrator wants to translate his Store content into). If a user wants to translate their module from English to Arabic. Then they need to follow the path app/code/Webkul/PaytabsSadad/18n in their unpacked magento2\_ Folders follow and receive a CSV file named en\_US.csv. Now they will rename this CSV to en\_SA.csv and translate all right-wing ancillary content into the Arabic language after the comma. Save it after editing the CSV. And then download it to the path app/code/Webkul/PaytabsSadad/18n where they have Magento2 on the server. The module is translated into Arabic. It supports both RTL and LTR languages. To receive the payments, the administrator must add his Sadad bank within the Paytabs account. Step 1: To create a merchant account, click here, enter the required information and click the Sign in button. Step 2: Now click on the page that appears, click the Next to Dashboard button. Step 3: You will receive a confirmation email to the email address you provided when you signed up. Click Check here. Step 4: Sign in with your email address and password (to create the account at Paytabs) and navigate to the Secret button option. Here you can find the secret key to enter in the module configuration settings. The trader can also manage his profile by navigating through The My Account&gt;My Profile, where the trader can easily update his information. In addition, the merchant must enter the website URL, i.e. where the sadad payment method was integrated via paytabs. To use this module from customers. To configure module settings, the administrator must navigate through Store-&gt;Settings-&gt;Configuration-&gt;Sales-&gt;Payment Methods-&gt;Paytabs SADAD Payment to list the module configuration settings. Now you will find yourself in the Module Configuration section, as shown in the snapshot below. Here, the administrator configures the available module settings - Enable - To enable this solution, select Yes or disable No. Title - Here, Admin can enter the title that appears under Payment Methods on the Product Check out page. Merchant Email - Enter Paytab's registered email address. The Paytabs Secret Key - Enter the Paytab access key that was received after registering with Paytabs. Payment from applicable countries - Select Allow payment from specific countries or all countries. Payment from specific countries – If selected specific countries under Payment from applicable countries option, then Admin can select the specific countries in which this payment method works. Sort Order — Set the order in which the payment gateway appears on the order page for the customers. Status of the new order - Set the new order status, which is set after a purchase order is completed using the Sadad payment method. After configuring the module settings, click the Save button to save the configuration. On the customer front end as a customer add products to the shopping cart and go to the checkout page, then on the Order Review & Payments SADAD payment method page will be visible on the upper left side of the website. You will now enter your Sadad account ID and click on the Place Order button and then you will be redirected to the Sadad payment system. Here, the customer must enter his Sadad account ID and password and then click on the Continue button. Payment. Now the page that appears has the transaction details. Select your secret image here, select a one-time password method, and click Then. After you click the Send button in the figure above, the customer can view the transaction details that include the following —merchant reference number, Sadad transaction number, transaction amount, description, and status of the transaction. Now the customer is redirected back to the dealer website. Here you can see the notification for the successful order. Once the order has been successfully placed, the customer can verify the order details by navigating to the My Account &gt; My Orders section. To check the details of the order placed, click the View button for each order. In addition, a customer can view and print their invoice, which is shown in the following screenshot. Admin can see the order details from the Back-End Sales -&gt;Orders. Here, the administrator can see the SADAD payment method that is used for the placed order. View the full list of purchase orders. And can select the job to view and manage the jobs. After you click the Show link, the order information page opens according to the following image. Admin can also use the invoice under Order view-&gt; Invoice Saudi Payments was established as a wholly owned subsidiary of SAMA with a mandate to continue sexist siting by continuing to develop secure, interoperable national payment infrastructure, serving banks and fintechs equally, and providing the necessary standardization to ensure that all providers have a level playing field. Saudi Arabian Monetary Authority (SAMA) was founded in the era of King Abdulaziz, may Allah bless his soul, issued by royal decrees on 20/4/1952. On April 1, 1990, SAMA established the Saudi Payment Network (SPAN) to promote the use of e-transactions in the banking system. The Saudi Riyal Interbank Express Electronic System (SARIE) was introduced on 14 May 1997. SADAD Payments System (SADAD) was introduced on March 10, 2004. In 2015, mada was born, the new identity of SPAN, which represents the innovative generation of electronic payments in Saudi Arabia. In 2019, the General Department of Payment Systems and SADAD Payment System merged under the name Saudi Payments. At Saudi Payments, we believe that the success of the company starts with the contribution of each individual and that we therefore invest in the skills and know-how of each individual to achieve this. Our goal is to create a collaborative and innovative working environment that enables individuals to reach their full potential, and we focus on making progress in this ever-evolving world by fostering innovation within the organization, as management is Maintaining payment solutions is the most important aspect of our business strategy. Find sources: SADAD – News Newspapers Books Scholar JSTOR (January 2016) (Learn how and when to remove this template message) (Learn how and when to remove this template message) The SADAD payment system was set up by the Saudi Arabian Monetary Agency (SAMA) as the national provider of electronic invoices for the Kingdom of Saudi Arabia (KSA). SADAD's core mandate is to facilitate and rationalise final payment transactions through all channels of the Kingdom's banks. SADAD was launched on 3 October 2004. SADAD connects the commercial sector and local banks and offers the possibility to collect customer payments electronically across all banking channels in the Kingdom 24 hours a day. History and background SAMA prescribed that all banks must accept invoice payments in their branches by everyone. The payer does not have to be a customer of the bank. The pre-SADAD economy of invoice payment was an excessive burden on banks: it was inefficient and slow. The banks covered a small part of the costs by keeping the collected money for different periods of 7 to 30 days after the invoice was paid. About 60-70% of the bills were paid in cash payments in bank branches. Due to the high number of invoices in the KINGDOM, this leads to high costs for banks in front office, payment processing, IT integration and coordination. Moreover, consumers queue at banks' counters for a long time before paying their bills. The submission and collection of invoices is largely manual and paper-based, causing significant inefficiencies and overheads for bills and banks. Large bill-ser concluded bilateral agreements with banks to improve the collection of invoices. This made it possible to use their banking channels to display and pay invoices (without consolidation of accounts). Each biller had to connect with the twelve different banks operating in KSA and from banks in order to connect separately with each biller with whom he is contracted. SAMA decided to integrate these connections through SADAD, a single platform that connects different bills and banks to enable consumers to access the any bank. SADAD now facilitates the payment of quantitative periodic invoices (e..B. electricity bills and telephone bills) and payments initiated by customers, such as.B traffic penalties. Like SADAD works Billers send summary invoices information to SADAD to a predetermined schedule SADAD validates received data and loads it into its database SADAD notifies billing agencies about any discrepancies customers request billing information via bank channels The bank forwards the request received to SADAD SADAD to sADAD SADAD and forwards it to the customer. its database on the basis of confirmation of the bank SADAD notified relevant invoice sending according to the end of the day, invoices receive reconciliation reports from SADAD, which show a breakdown of all transactions processed by SADAD. At the end of the day, SADAD initiates billing instructions via SARIE SADAD updates the status of invoices to settled Associated Indies Billers, which are associated with SADAD[1] Biller Code Educational services (9) King Abdulaziz University 9 Al Yamamah University 72 King Saud University 80 Arab Open University (AOU) 17 King Abdulaziz City for Science and Technology (KACST) 105 Taibah University 106 King Faisal University 118 King Fahd University of Petroleum and Minerals 117 um al-Qura University 132 Saudi Electronic University 137 Financial and Insurance Services (20) SHB Credit Cards 31 NCCI 3 Samba Financial Group (Credit Card) 12 NCB (Credit Card and Personal Finance) 16 American Express 18 SABB PS 29 Awan For Market Data 39 Mubasher 34 Falcon Credit Card from NCB 56 Bank Al-Jazira Credit Card and Financing Services 78 National Arab Bank 82 Al-Rajhi Bank 54 Riyad Bank 67 Saudi Credit Bureau (SIMAH) 36 Banque Saudi Fransi 71 Emirates NBD 125 Nayifat Rate Company 124 Al Rajhi Takaful 110 Bupa Arabia for Cooperative Insurance 130 Arabian Shield Cooperative Insurance Company 136 Government Services (65) Madina Municipality 6 Ministry of Water and Electricity 15 Riyadh Municipality 10 The Department of Zakat and Income Tax 20 Holy Makkah Municipality 27 Jeddah Municipality 28 Communications and Information Technology Commission 42 Eastern Province Municipality 25 Jeddah Chamber of Commerce and Industry 19 The Saudi Arabian Agricultural Bank 45 Saudi Arabian Standards Organization 49 Saudi Customs 30 Ministry of Commerce and Industry 13 General Commission for Tourism and Antiquities 57 Saudi Credit and Saving Bank 58 Tabouk Province Municipality 62 Hail Province Municipality 61 Jazan Province Municipality 64 Ministry of Transport 75 Qiyas 8 Ministry of Culture and Information 51 Ministry of Labor 50 Riyadh Chamber of Commerce and Industry 73 AlQassim Province Municipality 70 Real Estate Development Fund 40 The Saudi Industrial Property Authority (Modon) 68 The General Organization for Social Insurance (GOSI) 60 Aseer Province Municipality 84 von Finance 88 MOI-Alien Control 90 MOI-Driving License 91 MOI-Saudi Passport 92 MOI-Traffic Violation 93 MOI-Motor Vehicle 94 MOI-Labour Importation 95 MOI-Civil Registration 96 Najran Provinzgemeinde 87 AlJouf Province Gemeinde 103 Saudi Ports Authority 89 Ministry of Islamic Affairs (MOIA) 77 Ministry of Social Affairs (Global Goodness) 66 Municipality of Northern Borders 102 Saudi Food And Drugs Authority 109 General Authority of Civil Aviation 98 Baha Province Municipality 112 Royal Commission in Yanbu (RCY) 46 Taif Municipality 113 Saudi Arabian General Investment Authority (SAGIA) 108 Deputy Ministry for Mineral Resources (DMMR) 116 ABHA Industrie- und Handelskammer 114 MOI Abschiebeurteile 126 MOI Deportation Control 127 Ministry of Health 128 Saudi Council of Engineers 123 Government E-Procurement Project 141 Industrial Cities Development and Operating Co. 145 Saudi Heart Association 133 Ejar 153 Economic Cities Authority 154 Royal Commission for Jubail 146 Saudi Industrial Development Fund 143 ASHARQIA Chamber 139 Ministry of Foreign Affairs 101 Ministry der Justiz 160 Ministerium für kommunale und ländliche Angelegenheiten 177 Sonstige Dienstleistungen (18) Maestro Pizza 1041 Alyusr Rate Co. 24 AlYamamah Press Establishment 47 Al-Jazirah Zeitung 53 Arab Media Company 76 Aljomaih Automotive Company 52 Al Amthal Financing and Leasing Co.
